

**ARTHUR M. AGNELLO**  
Professor  
Department of Entomology  
Cornell University  
Cornell AgriTech at NYSAES

Geneva, NY 14456  
Tel: 315-787-2341

FAX: 315-787-2326  
E-mail: ama4@cornell.edu

**EDUCATION:**

B.S.	Cornell University, Ithaca, NY	1974	Biological Sciences
M.S.	University of Florida, Gainesville, FL	1979	Entomology
Ph.D.	North Carolina State University, Raleigh, NC	1985	Entomology

**PROFESSIONAL EXPERIENCE:**

1974-1976	Aquatic Weeds Research Officer, Ministry of Agriculture, Republic of Botswana, Africa.
1977-1979	Graduate Research Assistant, Department of Entomology and Nematology, University of Florida, Gainesville, FL
1980-1981	Survey Entomologist, Illinois Cooperative Extension Service, University of Illinois, Champaign, IL
1982-1985	Graduate Research Assistant, Department of Entomology, North Carolina State University, Raleigh, NC
1985-1986	Postdoctoral Research Associate, Department of Entomology, North Carolina State University, Raleigh, NC
1986-1992	Assistant Professor, Department of Entomology, Cornell University, NYS Agricultural Experiment Station, Geneva, NY
1992-2001	Associate Professor, Department of Entomology, Cornell University, NYS Agricultural Experiment Station, Geneva, NY
2002-Present	Professor, Department of Entomology, Cornell University, NYS Agricultural Experiment Station, Geneva, NY

**PROFESSIONAL RESPONSIBILITIES:**

**Extension 70%, Research 30%:** Extension efforts involve annually updating university control recommendations according to current research findings, providing diagnostic services for arthropod pests of tree fruit, monitoring the effectiveness of control programs to identify the causes of pest outbreaks, and cooperating with industry in the registration of new products. A second program area is the development and implementation of pest management approaches in tree fruit to maintain quality and production standards while minimizing potential economic and biological problems such as insecticide resistance, secondary pest outbreaks, and natural enemy population decline. Fruit pest management information is delivered through the use of bulletins, newsletters, e-mail reports and online publications, and personal contacts, including grower meetings, training sessions, field demonstrations, visits, and telephone and written counseling.

Research activities include applications of new sampling techniques for population monitoring and assessment of control options, mating disruption as an alternative to pesticide-intensive programs, and modified pesticide application technology for apple planting systems.

**PROFESSIONAL SOCIETIES:**

Entomological Society of America  
New York State Horticultural Society  
New York Apple Association

#### HONORS AND AWARDS:

- 2017 Team Award member, Federal Laboratory Consortium (FLC) for Technology Transfer Mid-Atlantic Educational Institution and Federal Laboratory Partnership Award for Specialty Crop Initiative Coordinated Agriculture Project: The Brown Marmorated Stink Bug. The Universities at Shady Grove, Rockville, MD.
- 2011 CALS Outstanding Accomplishments in Extension/Outreach
- 2006 Outstanding Service to Entomological Society of America
- 2005 Entomological Society of America, President, Eastern Branch
- 2003 Excellence in IPM Award, New York State IPM Program
- 2002 Entomological Society of America - Eastern Branch Nominee, Distinguished Achievement Award in Extension
- 1996 George A. Goodling Memorial Lecture. 137th Annual Meeting of the Pennsylvania State Horticultural Assoc.
- 1996 International Honor Award, Foreign Agricultural Service Recognition Program, USDA.
